Wirogram for 4 position switch for Telecasters.

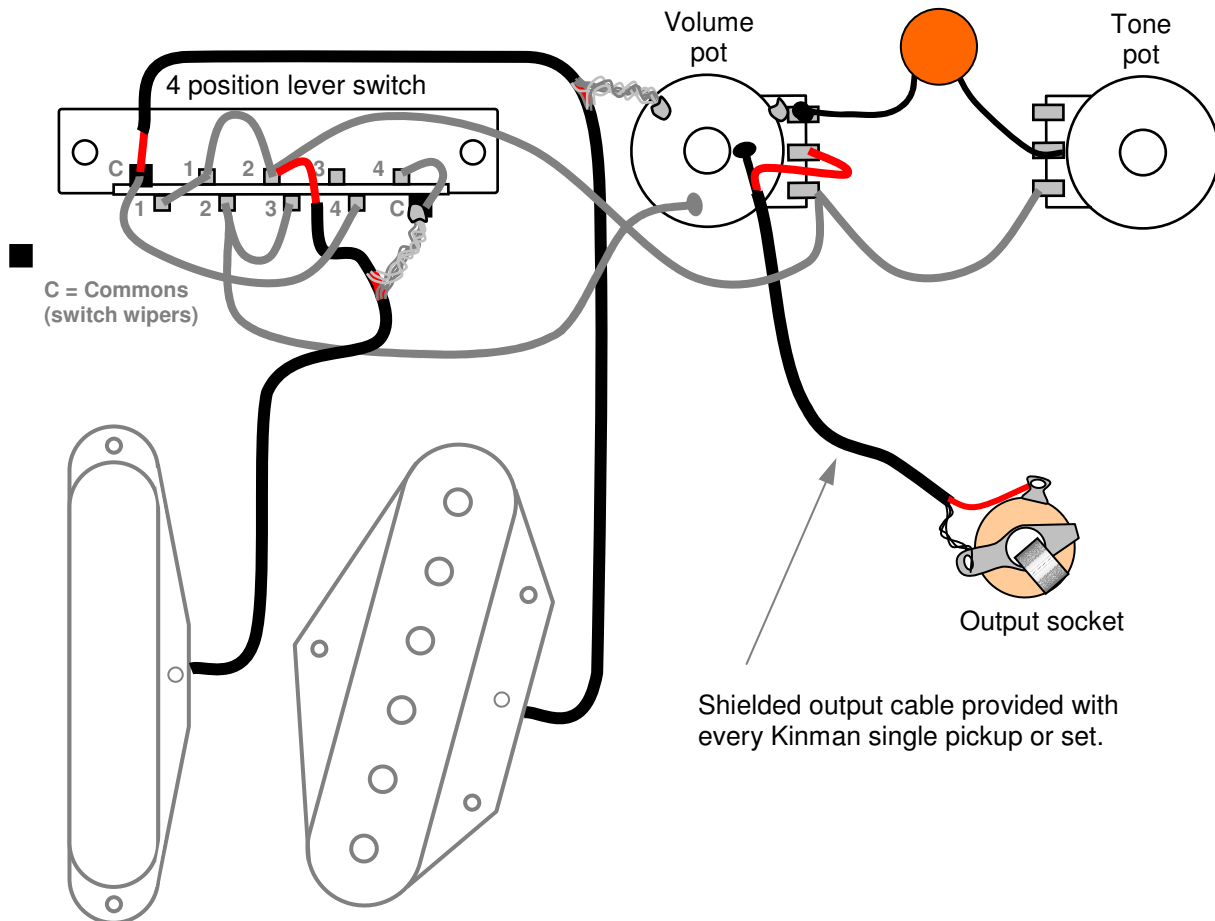

19-Dec-2007
© Chris Kinman

for Kinman Tele neck pickup with **2 conductor** cable (for pickups made until July 08),
use alternate 3 conductor cable circuit if appropriate (for pickups made after July 08).

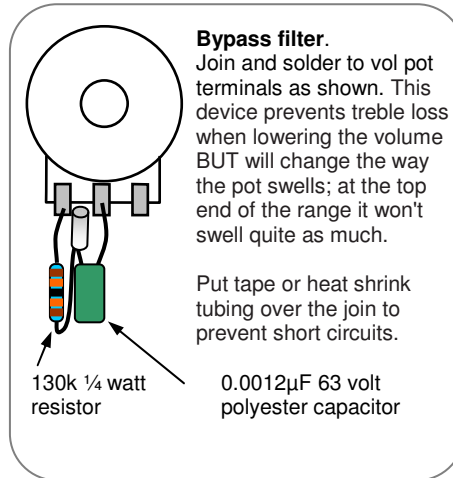

Switch positions:

- Position 1** Bridge pickup
- Position 2** Bridge + Neck in parallel
- Position 3** Neck pickup
- Position 4** Bridge + Neck in series

NOTE: this is essentially the same as Fenders wiring for 4 pos switch but is not the same as the Kinman TK4 NoSoldering Harness.

Notes about the famous Kinman bypass filter (treble bleed) for the volume pot.

Get these parts from your local Electronics supply shop. **Please don't ask us where to buy.**

This bypass filter is incorporated in every Kinman NoSoldering harness.
