Position 3 		
Position 2 		
Position 1 		

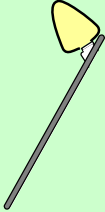

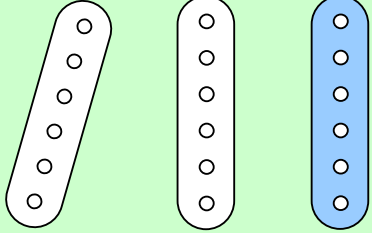

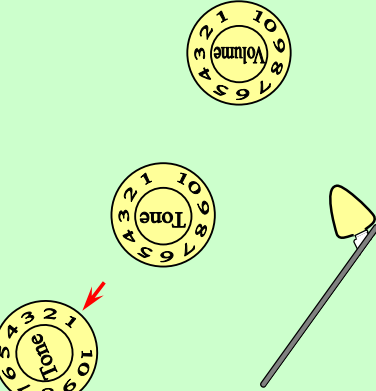

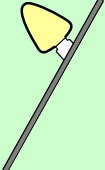

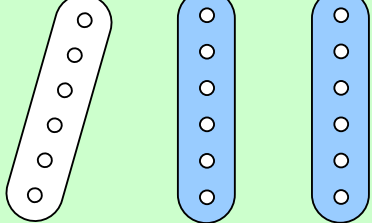

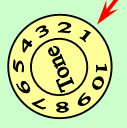

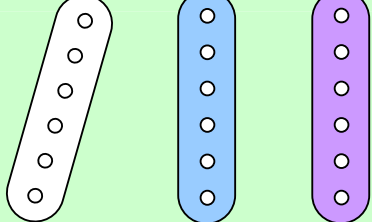

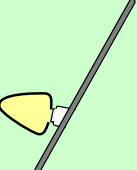

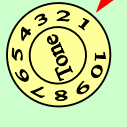

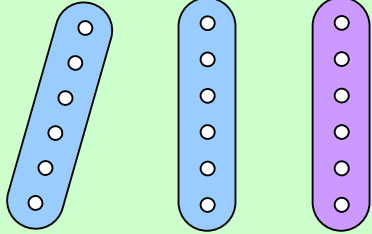

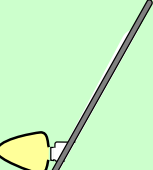

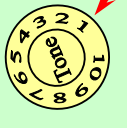

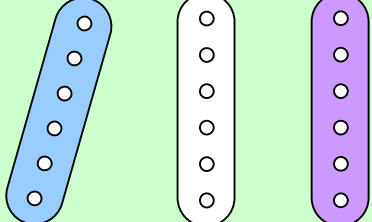

K7 mix pot is the lower control, by default. By request we do Custom control layouts

K7 mix pot at rest at '10'.

Functions of the optional Kinman K7 mix pot.

This table displays the pickup selection with the K7 mix pot operating the neck pickup at maximum mix. Note the extremely useful combinations of Neck + Bridge (for a Tele mid position sound) & all 3 pickups together (something new). Gradual mixing of pickups is also useful, displayed in Purple.

Selector position	K7 mix pot at full mix, at '1' on scale.	Purple indicates this pickups can be mixed in gradually by rolling the Mix pot down to '1'. Blue indicates pickup is switched on fully.	K7 mix pot is the lower control, by default. By request we do Custom control layouts.
Position 5 	 No effect		 K7 mix pot in action at '1'.
Position 4 	 No effect		Neck can be mixed with the Middle, from zero to full.
Position 3 			
Position 2 			
Position 1 			Neck can be mixed with the bridge from zero to full. This sound is like a Tele in the middle position.
